VR-Design Studio (Formerly UC-win/Road) New Features

Horizontal Curve of Railroads

VR-Design Studio is now able to design the cubic parabola commonly used in horizontal curve of railroads and transition curve with half the length of sine wave, at the turning points.

AutoCAD Civil 3D 2012 (32bit/64bit) now supported

AutoCAD Civil 3D 2012 is now supported.

New Road Generation option

When changes have been made only to some of the roads in a road network in the plan view, the user can select only the roads that have been amended to be re-rendered, thus, saving the user time.

Off-road Driving Improved

Vehicles can now rejoin the traffic.

New Sky Textures added

Eight new sky textures (sky domes) have been added.
