### **Forum8 Introduces SimCraft Driving Simulator at World Congress on Intelligent Transport Systems** (Orlando, Florida – October 21, 2011)

Forum8 featured an APEX3 GT full motion simulator from SimCraft to showcase their 3D visual interactive software at the 18<sup>th</sup> World Congress on Intelligent Transport Systems.

More than 10,000 delegates, including legislators, ministers, standards experts, engineers, and manufacturers from over 65 countries had the opportunity to experience how SimCraft's motion technology could be used with Forum8's VR software to create better transportation engineering solutions.

"Forum8's respected 3D VR software gave the perfect foundation to demonstrate the advantages that our APEX motion simulators range offers in this developing market area," said SimCraft's CTO Sean MacDonald. "It was a unique opportunity to get feedback on the potential of our technology from Aisin, BMW, Denso, Ford, GM, Honda, Panasonic, Toshiba and Toyota engineers and executives."

Dr. Brendan Hafferty, FORUM8's Western Regional General Manager said, "The combination of SimCraft's active motion driving systems and FORUM8's premium UC-win/Road VR software package gives the transportation industry an exceptional development, training and educational tool."

SimCraft's active motion vehicle simulators were originally developed to meet the most demanding training needs of military ground and air vehicle operatives and professional racecar drivers. The fidelity of its proprietary independent axis motion technology and extensive control software systems is now being used in a broader range of commercial and government engineering solutions.

About FORUM8 [www.forum8.com](http://www.forum8.com)

FORUM8 produces state-of-the-art 3D VR software. Its premier product, UC-win/Road, is at the forefront of 3D Visual Interactive Simulation technology. Established in 1987, this award-winning Japanese company has offices and partners worldwide.

About SimCraft [www.simcraft.com](http://www.simcraft.com)

SimCraft Corp., based in Atlanta, Georgia, creates active motion vehicle simulators to meet driver, pilot and enthusiast development needs. Its proprietary independent axis motion technology and extensive control software systems provide immersive and hi-fidelity performance in demanding commercial, defense, and entertainment applications.
