VR-Design Studio - System Requirements

Recommended System Requirements	
OS:	Windows 7/ 8.1 (64 bit)
CPU:	Intel Core i7 with 4 or more cores, 3.2GHz or greater
Memory:	6GB RAM or greater
Hard Drive:	SSD Drive. At least 20GB of free space. (you need at least this much 10GB of free space to install VR-Design Studio including sample data and landform data), and enough space to save additional data such as landscape model, models/textures downloaded from our Road Database, and recorded AVI files.
Graphics Card:	NVIDIA GeForce 970 Series GTX or greater, 1GB or greater Please refer to below table for graphic cards info.
Display:	1920x1080 or greater. In terms of screen design and font size, only the default settings are supported.
Optical Drive:	DVD Drive
Sound Card:	Any

Note:

To enable driving simulation, you will need to have a Logitech steering wheel which includes steering wheel, brake, and accelerator (sold separately). Please refer to the page below for more information on our VR-Design Studio Drive Simulator.
http://www.forum8.co.jp/english/uc-win/road-drive-e.htm

You need to be connected to the Internet in order to download sample data, sample models, etc. from our RoadDB and use them.

***When using multiple screens**, 2 or more graphics cards will be required – one NVIDIA graphics card has two outputs, therefore, when using 3 screens, 2 graphics cards will be required and when using 5 screens, 3 graphics cards will be required. Please also ensure that when using multiple graphics cards, all the graphics cards are the same model.*

Please ensure that your system meets at least the minimum requirements before ordering a trial version or purchase. However, you should run the software on systems with the recommended requirements.

*Please set design, font, and size of screen to default. Also, we recommend you use a monitor having the size of at least 20 inch.

		R7 M260
		R9 M290X
		R9 M275X
		R9 M270X

Note:
The AMD chips may cause a problem in areas where NVIDIA chips don't cause problems. They may cause the system to slow down depending on the version of the driver,
